Department of Geography

Report on Departmental Gardening Programme

Target Group: II Semester Hons. Students

Date: 27/02/2026.

The Departmental Gardening Programme was successfully conducted on the college campus near the Girls' Hostel with the active participation of II Semester students. The programme was organized with the objective of promoting environmental awareness, and encouraging students to take responsibility for maintaining a clean and green campus.

Initially, the gardening activity was scheduled to begin in the morning. However, due to unfavorable weather conditions, the programme was postponed. Once the weather improved and became suitable for outdoor work, the gardening activities commenced after 2:00 PM.

All Geography hons II Semester students were specifically targeted for this event to ensure their active involvement in departmental co-curricular activities. Under the supervision of Dr. Dilliram Dahal (Assistant Proferssor *cum* HOD) and Mr. Kalden Tamang Assistant Professor, students enthusiastically participated in various tasks such as cleaning the garden area, removing weeds, preparing soil beds, and maintaining the surroundings.

Despite the delay caused by bad weather, the programme was carried out successfully. The students demonstrated teamwork, responsibility, and dedication throughout the activity. The area near the Girls' Hostel was significantly improved and beautified as a result of their collective efforts.

The Department appreciates the sincere participation of the II Semester students and looks forward to organizing similar activities in the future to promote environmental sustainability and student engagement.
