

Report on the Observation of World Environment Day

Date: 5th June 2026

Venue: Departmental Garden

The Department of Chemistry observed World Environment Day on 5 June 2026 with the active participation of faculty members and students. The programme was organized in accordance with the instructions issued by the college authorities to promote environmental awareness, conservation, and sustainable practices among students. The observance was conducted in the spirit of this year's World Environment Day motto, "Inspired by Nature. For Climate. For Our Future," emphasizing the importance of nature-based solutions for environmental protection and sustainable development.

As part of the observance, students were encouraged to bring necessary plantation equipment from their homes along with suitable saplings for plantation. The students enthusiastically participated in the plantation drive and contributed to the greening of the college campus.

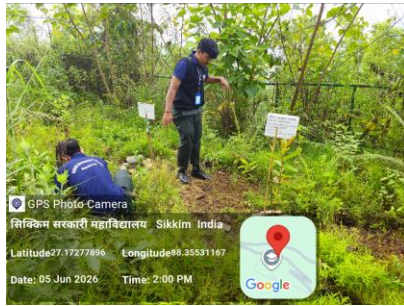

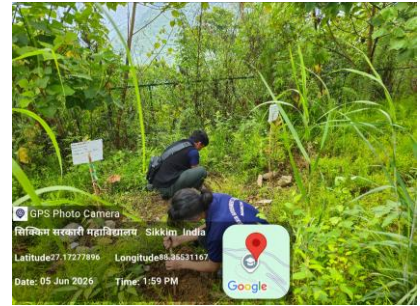

Special emphasis was given to the participation of Semester II students, who planted saplings at designated locations within the Departmental Garden. The students were encouraged to nurture and monitor the growth of these plants throughout their period of study at the college.

A cleanliness drive was also conducted in and around the campus to create awareness regarding environmental hygiene and the importance of maintaining a clean and healthy environment.

The programme was supervised by the Head of the Department and all faculty members, whose presence and guidance ensured the successful implementation of the plantation and cleanliness activities. Their active involvement motivated the students and contributed to the smooth conduct of the programme.

The programme witnessed enthusiastic participation and helped inculcate a sense of environmental responsibility among the students. The Department remains committed to continuing such initiatives to promote environmental protection and sustainable development.
