**Report on Plantation and Cleanliness Drive on the Occasion of World Environment Day
2026**

Date: 5th June 2026

Venue: SGC, Namchi

On the occasion of **World Environment Day 2026**, the Department of Commerce, SGC, Namchi organized a Plantation and Cleanliness Drive under the guidance of **Dr. Dewan Rai, Head of the Department and Assistant Professor, Department of Commerce**. The programme aimed to create environmental awareness among students and encourage active participation in protecting and preserving nature.

The programme was attended by all faculty members, non-teaching staff, and students of **B.Com II, IV & VI Semester** and **M.Com II & IV Semester**. The participants enthusiastically took part in the plantation and cleanliness activities conducted within the college campus.

Students brought a variety of saplings, including flowering plants, fruit-bearing plants, and other plantation materials and equipment. The saplings were planted in the designated gardening area of the college. To promote a sense of responsibility and ownership towards environmental conservation, students were instructed to place nameplates near the saplings planted by them.

As part of the initiative, the Department of Forest distributed five flowering and fruit-bearing saplings to each department of the college to promote continuous greening efforts across the campus. The plantation programme was followed by a cleanliness drive, during which students, faculty members, and non-teaching staff actively participated in cleaning the campus surroundings and ensuring the proper disposal of waste. The cleanliness drive was conducted to encourage collective responsibility towards maintaining a clean, healthy, and sustainable environment.

The programme successfully fostered environmental consciousness among students and staff while contributing to the beautification and ecological sustainability of the college campus. The active participation of all stakeholders made the event a meaningful and successful observance of World Environment Day 2026.

Outcome of the Programme:

- Enhanced awareness regarding environmental protection and sustainability.
- Plantation of flowering and fruit-bearing saplings across the campus.
- Promotion of cleanliness and hygiene through collective action.
- Encouragement of individual responsibility towards nurturing planted saplings.
- Strengthening of community participation in environmental conservation activities.

The Department of Commerce expresses its sincere gratitude to all faculty members, non-teaching staff, and students for their wholehearted participation and contribution towards the success of the programme.
